Prespecify the question and protocol
Domain, strata, supports, windows, criteria, and benchmarks
K1 and K2: comparative soil criteria
Carbon stock and sediment export
Target and panel-mean uncertainty
K3: normative no-conversion safeguard
Actual gross conversion within fixed F
Fixed window; event and area uncertainty
Check validity and eligibility; derive margin intervals
Invalid input: stop for correction. Missing/ineligible: retain reason.
V: upper bound < 0
Nonfulfillment supported
A: lower bound ≥ 0
Satisfaction supported
I: otherwise
Indeterminate
Report the complete criterion profile and joint conclusion
Any V → V; all required A → A; otherwise → I
Keep current condition and temporal stock change separate
Evidence informs judgment
Separate decision appraisal
Plausible harm, urgency, feasibility, rights, responsibility
Investigate, consider management options, or wait
No action is selected by A, V, or I alone
